

Declaration of production and material

All our products, listed below, are manufactured in Sweden or Denmark, using components and materials that are manufactured in Sweden and other EU countries, plus Norway.

Our products:

NOAQ Tubewall TW50, TW75, TW100, TW135

NOAQ Boxwall BW50-IC, BW50-OC, BW52, BW52-GL, BW52-GR, BW102, BW102-IC, BW102-OC

The NOAQ Tubewall is manufactured by ultrasonic welding of reinforced PVC. The PVC fabric comes from Sioen Industries in Belgium, the spacer mat comes from Isola AS in Norway and the valves come from Monsun Air System AB in Sweden. The Tubewall is manufactured by Northern Hall And Cover, Kabelvägen 14, 861 36 Timrå, Sweden.

The NOAQ Boxwall BW50-IC, BW50-OC, BW52-GL and BW52-GR are manufactured using vacuum forming of sheets of ABS plastic. The raw material for the BW50 products is ABS from Arla Plast AB in Sweden. It comes as square boards, colored in red, to the factory manufacturing the final product (Formplast AB, Industrigatan 1, 289 92 Broby, Sweden). The manufacturing process is vacuum forming and sealing strips are glued.

The NOAQ Boxwall BW52, BW102, BW102-IC and BW102-OC are manufactured using mold injection of PP (Polypropylene) plastic. The raw material for these products is PP from Polykemi AB, Bronsgatan 8, 271 39, Sweden. It comes as granulate, colored in red, to the factories manufacturing the final product (Plastinject AB, Box 152, 334 23 Anderstorp, Sweden and Idé-Pro Skive A/S, Skyttevej 15, 7800 Skive, Denmark resp.).

The soles and sealing strips that are glued on the underside of the NOAQ Boxwalls are made of extruded polyeter and rubber (StyrenButendienrubber). Sealing strips for all BW products (representing a very small percentage of the total value) are manufactured by National Halmstad, Krontorpsvägen 14, 302 65 Halmstad, Sweden, and Kuntze & Co, Västbergavägen 19, 126 30 Hägersten, Sweden resp. They contain material manufactured by Nitto Belgium (Belgium), Interret (France), Reticel (Sweden), Prochimir (France) and a Polish company, which come to the factory as a strip which is a finished product.

Sincerely,

Sigurd Melin
CEO
